Hiring Team

Wipro

Subject: Application for Graduate Engineer Trainee.

Dear Hiring Team,

I am writing to express my interest in the **Graduate Engineer Trainee** position at Wipro. As someone who enjoys building software, solving technical problems, and continuously improving my engineering skills, I believe this opportunity aligns perfectly with both my technical background and long-term career goals.

During my internship at TechnoSignia, I worked on Java-based applications where I gained practical exposure to backend development using Java, Spring Boot, Hibernate, JDBC, REST APIs, and MySQL. I was responsible for developing application modules, optimizing SQL queries, processing large volumes of data, debugging issues, participating in code reviews, and collaborating with the development team to deliver reliable software solutions. These experiences strengthened my understanding of software development, maintenance, testing, and performance optimization in a professional environment.

I developed projects including a Banking Management System and Job Portal System. These projects helped me apply Object-Oriented Programming, Database Management Systems, software design principles, and clean coding practices while focusing on scalability, maintainability, and efficient database operations. Working on these projects taught me that writing code is only one part of software engineering—the real value comes from building solutions that are reliable, maintainable, and solve real business problems.

What attracts me to Wipro is its strong engineering culture, global collaboration, and commitment to innovation. I appreciate the opportunity to work on diverse technologies while learning from experienced professionals and contributing to projects that create meaningful business impact. I am particularly excited about working in an environment that values continuous learning, teamwork, and high engineering standards.

Beyond technical knowledge, I bring a disciplined work ethic, analytical thinking, adaptability, and a collaborative mindset. I enjoy learning new technologies, understanding business requirements, and approaching every challenge with curiosity and a problem-solving attitude. I am confident that these qualities, combined with my technical foundation, will allow me to contribute effectively as an **Graduate Engineer Trainee**.

Thank you for considering my application. I would be grateful for the opportunity to discuss how my skills, internship experience, and enthusiasm for software engineering can contribute to Wipro success. I look forward to the opportunity to speak with you.

Sincerely,

Aayushi Jat
